KIRKOS ...a new circular seating form

The extraordinary design of the Kirkos takes one piece of plywood and molds it into an encircling shape and is then pressed together and connected on the seat bottom. This compression of the shell must be controlled by the quality of the veneer and uniqueness of the mold that shapes this chair. The chair is available in four variations — all wood, wood with seat pad, wood with seat and back pad, and fully upholstered insert.

To emphasize this unique shape, the name given to this chair — KIRKOS — is the Greek word that means to encircle, which is exactly what the chair does to the user.

front to back: KI-7010-MM-CH / 7000 Maple, KI-7010-OA-CH / 8100 Oak, KI-7010-BB-CH / 1000 Beech, KI-7010-OA-CH / 8000 Oak, KI-7010-BB-CH / 2100 Beech, KI-7010-BB-CH / 2200 Beech. All in Chrome.

Single shell offers open handle area to move chair in cafeteria environment.

Shell has contours that fit the body and creates a unique aesthetic.

One-piece shell wraps around and is connected together to form arms.

Translucent stacking bumpers for wood chairs.

White seat pans for stacking on upholstered chairs.
