INTRODUCING JOY! A fresh new look and feel in quality guest seating, featuring custom molded materials and shapes that are engineered for today's more physical demands. One glance at its' clean, soft lines and shaped contours tells the story. Here is truly a guest seating standout for discriminating specifiers with restricted budgets.

Designed for comfort, high performance and extreme versatility, the JOY Seating System features several exciting engineering innovations. The components are modular, individually field replaceable and include protective outer seat and back shells. The guest/stack chairs are roomy, compact, light weight (for ease of handling) and body shaped for extra comfort. The chairs and beam seating units can be rearranged with optional arms and/or swing away tablet arms added, deleted or relocated. The occupant spacing between seats is field adjustable. Choose from upholstered, wood or textured plastic seats and backs. A superb flexible mesh back option (shown) is also available.
