Congresso™ Series* Stackable Seating

Style and comfort are in session.

Developed by the European design team of Kerstin & Volker Bartlmae, our Congresso Series brings an air of stylish nobility to the room. Available in more than 25 standard powdercoat finishes, along with additional chrome and satin nickel-plated options, this series features a contoured seat and back with passive FLEXBACK COMFORT technology, SUPERTOUGH™ floor glides and a patent pending ganging device. Just as impressively, our High Density stack design allows you to store 12 Congresso stackers in the same space as 10 conventional banquet stackers.

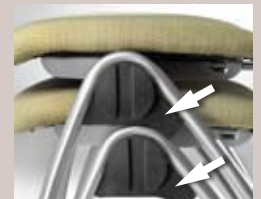

Congresso Series Stackers stack comfortably 12 chairs high – in the same vertical height as 10 conventional banquet stackers. 20% more chairs in the same space.

This ganging device, patent pending, can be positioned to add or remove chairs from the beginning, end, or middle of the row, leaving the other chairs in place.

SUPERTOUGH™ floor glides are made from impact-modified material with a “rubberized” additive that makes them significantly more impact resistant than standard nylon glides.

Congresso stackers come standard with the MTS “stack wing.” This non-structural component assists the chairs to stack straight and securely each and every time saving time and money.

a. 681 Apple Back
19-3/4" w x 23-1/4" d x 33" h

b. 681T Apple Back w/ integrated hand hold
19-3/4" w x 23-1/4" d x 33" h

600 Series Convention Stacker

Chairs that call for an audience.

Conventional wisdom dictates a growing need for seating that offers superior stackability, easy ganging and long-term durability – all while providing for maximum comfort. For the answer, look no further than our 600 Series Convention Stackers. Engineered with 3/4" 16-gauge square steel tubing and fully contoured seats and backs, these chairs strike the perfect balance between form and function. Better yet, all models feature silhouette style backs with no exposed fasteners, rubber-cushioned premium metal base glides and a 12-year structural frame warranty.

Models 675 and 676 are designed with the MTS patented Stacker-Ganger bracket. This structural component ensures secure stacking and ganging, keeping chairs together when the row is pushed or tipped.

Models 677 and 678 come with a standard stacking bar that helps chairs stack squarely, reducing wear and tear on seat upholstery.

An optional wire ganging device can be added to models 677 and 678 to provide straight rows in convention seating situations.

All 600 Series models feature a contoured back and seat design for added support and improved seating comfort.

a. A flat waterfall style seat is optional on all 677 and 678 Series Stackers. Specify USS.
b. An optional COMFORTweb® flat seat is available on all 677 and 678 Series Stackers. Specify CWS.

a. 675 Rectangular Back with Stacker-Ganger Bracket
Plated finishes only. Chrome standard. Satin nickel chrome optional.
21" w x 21-1/2" d x 33-1/4" h

b. 676 Oval Back with Stacker-Ganger Bracket
Plated finishes only. Chrome standard. Satin nickel chrome optional.
21" w x 22" d x 36" h

c. 677 Rectangular Back with Conventional Stacking Bars
Powdercoat standard. Optional plate finishes available.
20" w x 21-1/4" d x 33-1/4" h

d. 678 Oval Back with Conventional Stacking Bars
Powdercoat standard. Optional plate finishes available.
20" w x 22" d x 36" h

Convention Seating Storage and Handling Options

MTS offers a wide variety of storage and handling options for the entire collection of stackable seating. The collection is highlighted by the *custom manufactured* 020 storage rack, each designed to carry approximately 75-100 chairs. Each rack is designed and precisely manufactured to fit your facility requirements and customer order specifications. Stackable up to three racks high, these heavy-duty, high-volume storage racks make storage and handling in large facilities quick and easy. With the addition of individual hand trucks, also manufactured series-specific for precise handling and transport, the 020 custom storage racks are a breeze to load and unload.

1 "V" Channel design allows the 020 racks to stack straight and securely with ease.

2 Optional jack stands are required when stacking 020 racks. Specify 4 each #020JS.

3 All 020 storage racks come standard with two swivel, and two fixed, 5" heavy-duty casters.

4 U-style leg rails safely hold chair legs in place and keep chair stacks from slipping or sliding off the rack.

5 Safety chains with quick-release clips keep the stacks from tipping during transport. Standard on all 020 storage racks.

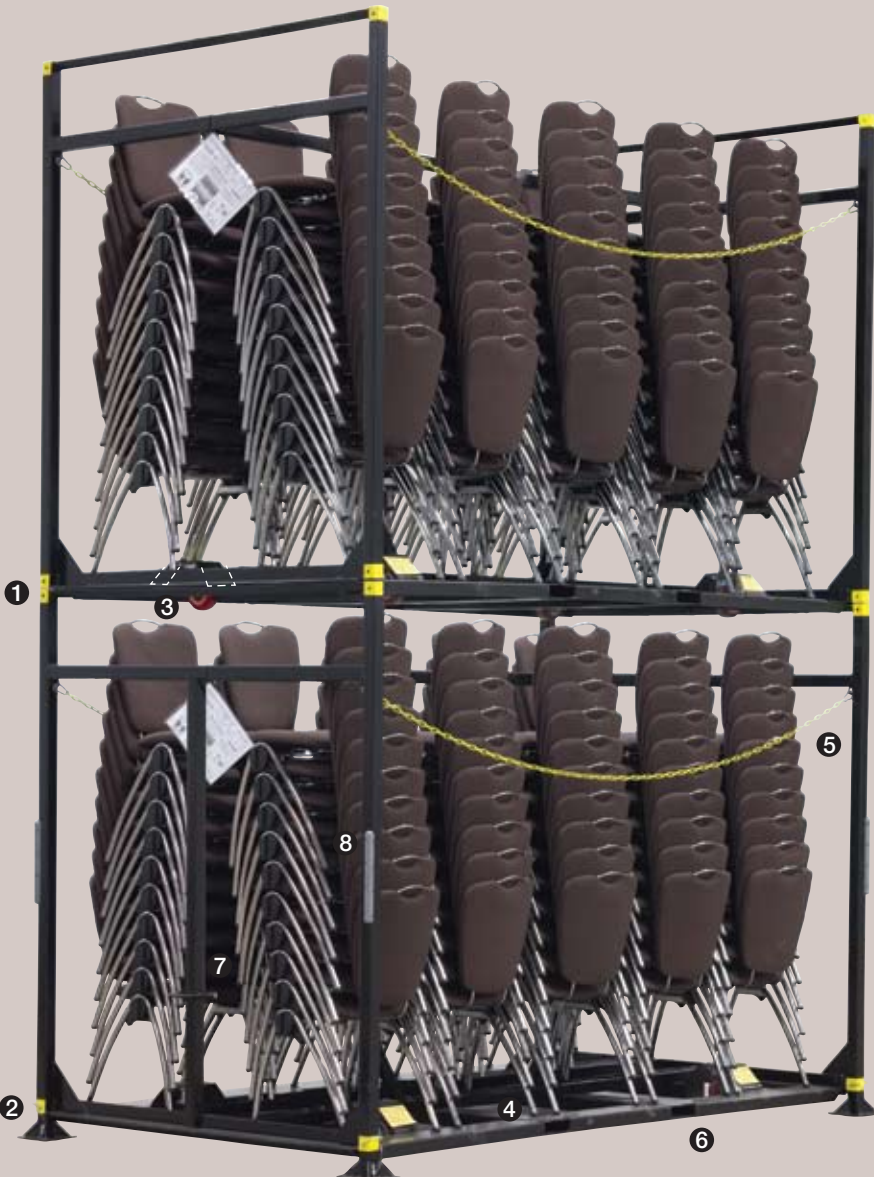

6 Forklift channels, manufactured to customer specifications, are designed to keep the rack from sliding during transport and also protect the chairs from "fork" damage.

7 An optional tow ring is available offering a variety of transport options. Specify #020TR.

8 Optional protective rubber bumpers are available to be protect walls and hallways during transportation. Specify PBE.

Series-specific hand-trucks are designed to safely transport chair stacks and load quickly and efficiently onto 020 storage racks.

Each MTS stackable seating series has its own series-specific hand truck, manufactured to transport up to 15 chairs high (depending on the series).

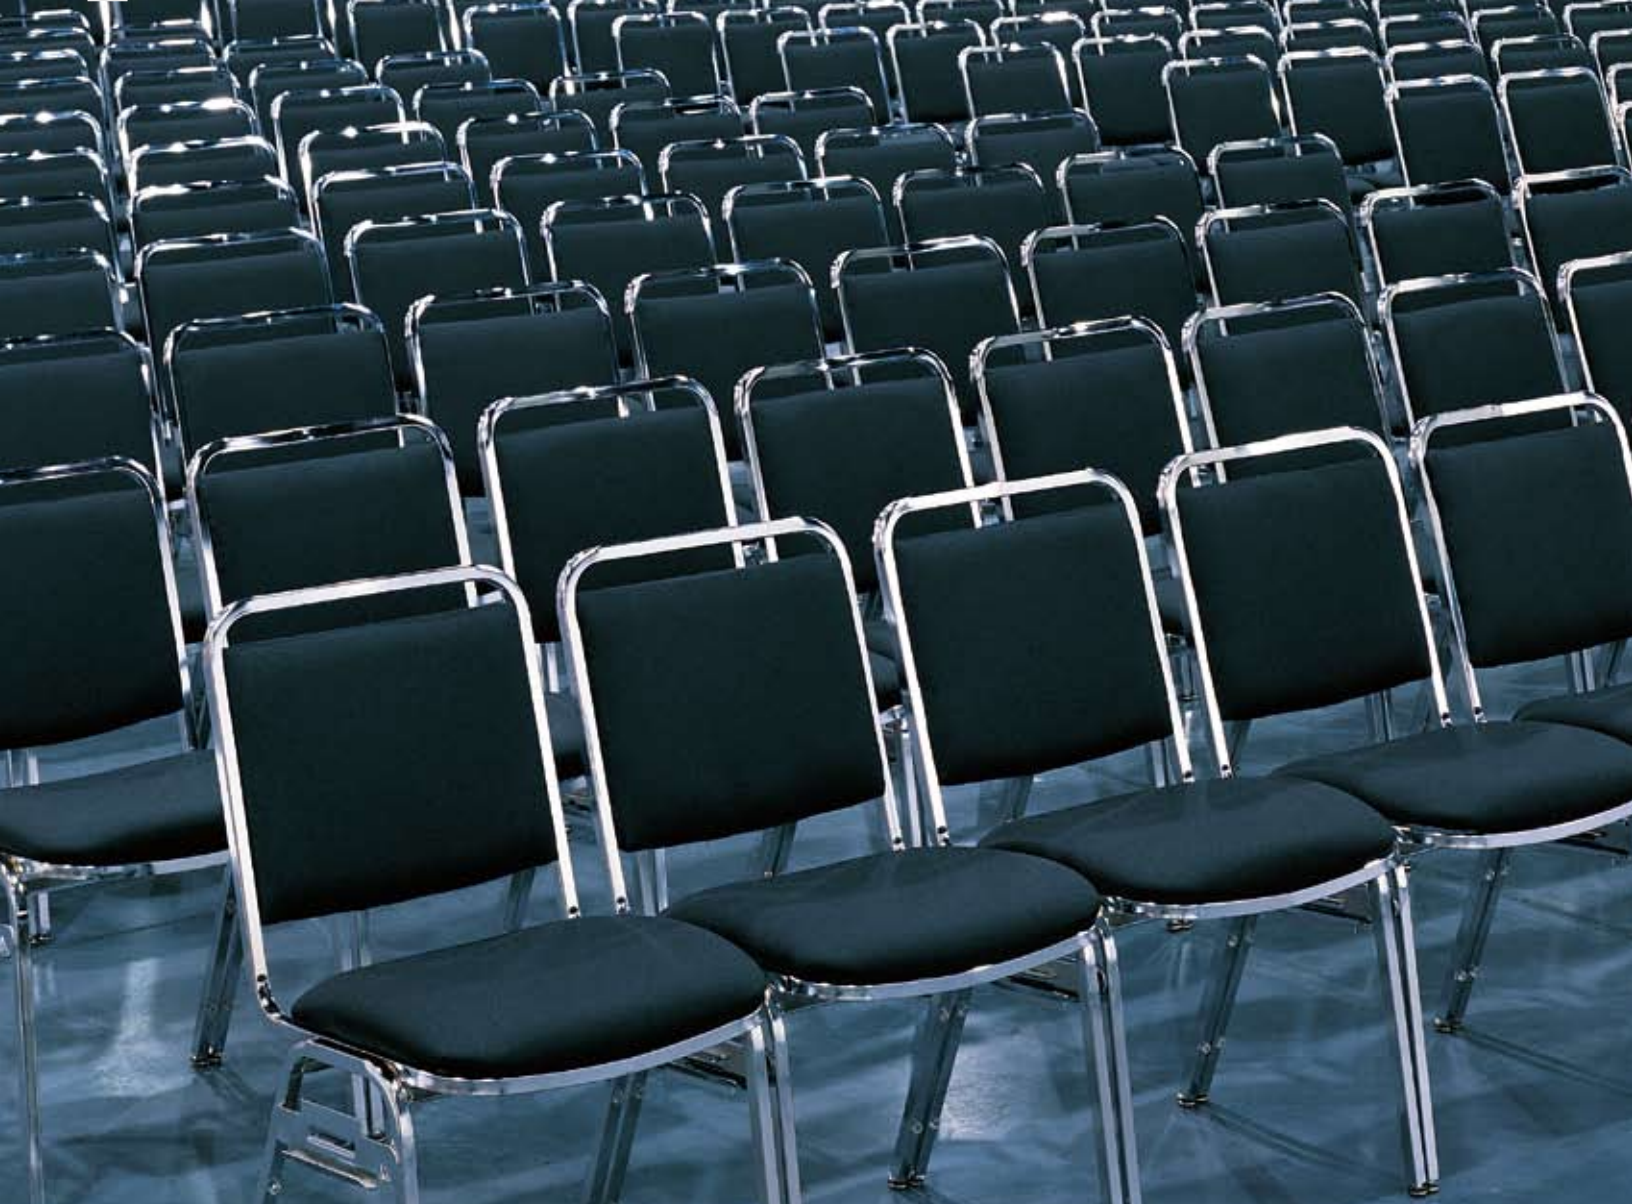

014 Heavy-duty Hand Truck fits all Congresso models.

016 Heavy-duty Hand Truck fits 675, 676, 677 and 678 Convention Stack Chairs.

Four jack stands for bottom rack are required when stacking 020 racks.

Sit Green.

It's not just a seat. It's a style.

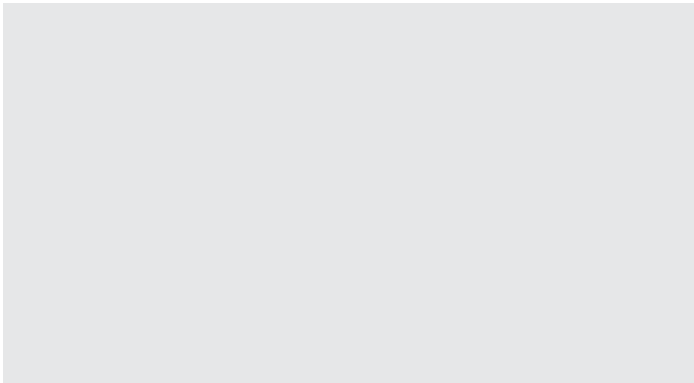

To combat the impact that manufacturing processes can have on our environment, MTS developed SynerGreen™. This eco-friendly philosophy was designed to make continuous environmental improvements in our processes and products without compromising sound business principles. Through aggressive recycling programs, reduced emissions, and energy conservation efforts, we're creating seating solutions that allow us all to rest a little easier.

Visit our website at mtsseating.com to find out more about our SynerGreen program and for the big picture in turnkey solutions for every seating setting. Discover performance engineering, ergonomics today's hospitality industry demands, and the design impact to make a lasting statement – whimsical to romantic, retro to regal.
