patient chair  
with Self Adjusting Movement

Designer: Charles Gibilterra

## Design and Engineering Enhancements

A patented self adjusting motion system eliminates the need for knobs or controls. The back, seat and arms are synchronized to recline in harmony up to 35 degrees.

Special built-in nylon wheels activate and mobilize the chair when tilted, allowing it to be easily transported on commercial carpeted or hard surface floors.

Backs and seats are easily removable for re-upholstery or replacement. The cantilevered arms allow plenty of leg space and quickly flip out of the way for easy access.

A choice of pneumatic seat lifts allow for a wide range of height adjustments to accommodate occupants of all ages and assist in access and egress functions.

Steel reinforced urethane arms have soft textured handle like grips and are field replaceable. The cam action pivot system provides quick and easy access.

No corner legs to trip over! The Clean, pedestal base design provides extra leg room for better relaxation and access/egress functions.

Soft cushioned stool  
in matching finishes

- Therapeutic Permeable Mesh Upholstery
- Up To 35 Degree Synchronized Seat/Back/Arm Recline.
- Supporting Suspension Surfaces Disperse Body Pressures For More Comfortable Healing
- Cam Action Pivoting Soft Urethane Arms
- Removable Components For Cleaning & Maintenance
- Self-Adjusting Recline System Adapts To Body Motion
- Pneumatic Seat Lift For Safer Access and Egress
- Built-in Nylon Wheels Mobilize Chair When Tilted
- Supports users up to 350 lbs. and complies with select ANSI/BIFMA standards

A special therapeutic permeable mesh upholstery material is custom woven for a sock style fit over the multiple contoured tubular steel back frame.

It provides a breathable flex action comfort support to individuals of all sizes and shapes. The multiple contoured seat is constructed of high resilient foam and upholstered with two-way stretch upholstery for deep cushioned sitting comfort. Both the seat and back are available in a variety of upholstery materials and are easily field replaceable.

But there's still more....

# Sam patient chair

Introducing the next level in patient care, rest and rehabilitation. A seating system so advanced that it responds to body motion to perform its multitudes of comfort and support features. Its self adjusting movements are facilitated by a new patented mechanism that allows the back to recline in excess of thirty degrees while the seat moves forward in synchronization. The steel reinforced urethane arms individually flip up and out of the way for easy access and egress. A single lever activates a pneumatic lift to provide variable seat heights for patients of all sizes and shapes. That same lever also can lock the recline system at desired comfort levels. But there's much more.....

# Sam<sup>II</sup> Patient Chair

Welcome to a new era in patient care and rehabilitation furnishings. **Sam II** is loaded with features, including a special therapeutic permeable mesh seat and back. It provides extra body support with a two-way flex action comfort and a breathable, easy cleaning, multi-layered upholstery. Both the seat and back are designed for quick replacement and field re-upholstery. Sam's cam action pivoting, cantilevered arms allow plenty of leg space and quickly flip out of the way for easy access. The steel reinforced urethane arms have replaceable soft textured handle like grips. Built-in nylon wheels activate and mobilize the chair when tilted.

 From its multiple contoured head-rest to the caster activated sled base, Sam is loaded with innovation. Its sleek slim line profile makes it a perfect companion for tight quarters and compact spaces. The durable powder coated tubular steel frame provides a flex action comfort, is scratch and stain resistant and easily wipes clean. It is also loaded with green and recyclable field replaceable components. See both the **Sam Recliner** in motion and **Sam II** by going to [www.eoccorp.com](http://www.eoccorp.com) ... or call EOC Customer Service at 800-421-5927.
