Patterns of collaboration and change

dewey™

fixturesfurniture

Classrooms that inspire better ways to teach and learn.

New approaches to teaching and learning are everywhere you look. Don't plan on getting used to them, though—they'll change again.

That's why it's so important for classrooms, teaching tools and furniture to be as flexible as possible.

Think about students and teachers who are on the move more than ever, collaborating, researching, debating and reconvening. They need furniture that's ready to move, too. What about the new technologies that enter the classroom, becoming increasingly central to the exchange of information? They need furniture that can protect and power, here or there. And now that classrooms are being used by several groups in many ways, day and night, the furniture should flex, reconfigure, and withstand years of hard work and play.

Dewey does all that. But it's not just about accommodating new teaching styles. Dewey goes a step further and actually inspires better approaches. That was our central goal, as Fixtures Furniture developed Dewey—listening, learning and ultimately leading with a new wave of products for learning environments. This collection encompasses all we've learned, so you can count on it to inspire the learning of the future.

Patterns and flow

Create a flexible classroom. Find solutions through conversation. Gain inspiration by moving about to see what others are doing. Circle around for presentations and group debates. Then square up for a pop quiz. Easy with Dewey.

Problem solved. Small groups solve problems together. The instructor moves from group to group, lending ideas and posing challenges. Laptops are close at hand and powered up.

Dewey: smokey white laminate, platinum urethane edge on tables and Buddy, white edgeband on bookcases, satin silver frame. Hannah chairs by izzy: fresh water poly, silver frame.

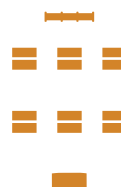

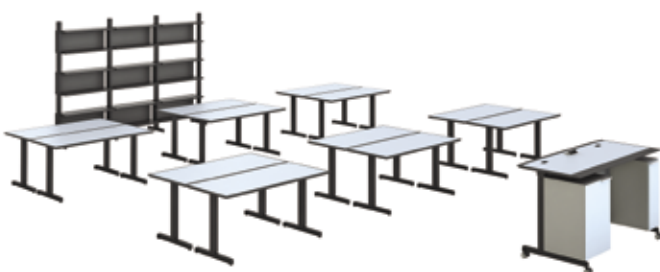

Access. Power laptops, share ideas or delve into a serious debate.

Dewey: wild cherry laminate, platinum urethane edge, satin silver frame, smokey white case.

Stadium style. Don't miss a thing happening up front, even if you're in the back.

Dewey: natural pear laminate, smoke urethane edge, satin silver frame, smokey white case.

Group work. Experiments and small group discussions are well supported.

Dewey: shadow blue laminate, black urethane edge, black frame, wrought iron bookshelf.

All eyes up front

It's good to have options. Dewey supports different classroom layouts, which in turn support different teaching styles. When students feel more visually connected to the instructor and one another, interacting and learning is easier. Period.

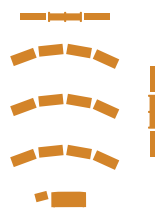

Focus. Get a good view of the presentation, or concentrate on your individual work with this ordered, straight-forward approach.

Dewey: chalk white laminate, platinum urethane edge, satin silver frame, maritime grey case.

Flexibility. Teach however you want with furniture on wheels that readily follows your lead.

Dewey: bittersweet laminate, platinum urethane edge on tables and Helpdesk, white edgeband on bookcases, satin silver frame, maritime grey case. HÅG Conventio Wing chairs: white poly, silver frame.

Balance. Adjustable height tables allow for a stadium-like approach for presentations.

Dewey: thunder laminate, dolphin urethane edge, gunmetal frame, wrought iron case.

Choice

Clearly, there are as many ways to configure a classroom as there are teaching styles and subject matter. Dewey doesn't restrict freedom or dictate how things are done—it goes with the flow, as teachers and students lead the way.

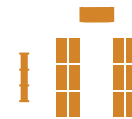

Lecture. Instructors and students can easily see one another, supporting discourse and dialogue.

Dewey: bamboo cane laminate, platinum urethane edge, satin silver frame, smokey white case. Sling Swivel chairs by Harter: banana calypso sina pearson fabric, brushed silver frame.

Get face time. Collaborate. Discuss and debate. Everyone can see everyone else, facilitating better conversations and more idea sharing.

Dewey: thunder laminate, graphite urethane edge, gun metal frame, maritime grey case. Fetch chairs by Fixtures Furniture: warm grey thermo, satin silver frame.

Break it down. Splitting into smaller groups makes large classes more manageable, encouraging options and interaction.

Dewey: monticello maple laminate, smoke urethane edge, warm grey frame, maritime grey case. Emotion chairs by Fixtures Furniture: lime green thermo, platinum frame.

Learning happens everywhere

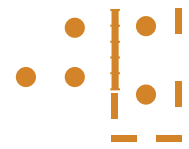

We all know those in-between spaces—the ones tucked among classes, dorm rooms, offices and entrances—are actually at the center of everything.

Learning that starts in the classroom continues in these spaces... or starts in these spaces before migrating to the classroom. Students gather and meet in various configurations, sharing new ideas in fresh combinations. Instructors wander by and interact in organic, spontaneous ways. People find a few moments alone, to read or check email, without ever entirely leaving the mix. Dewey knows just how to define those spaces in subtle, appealing ways.

Cozy up. Freestanding bookshelves carve out intimate spaces for study and conversation.

Dewey: monticello maple laminate bookcase, smokey white laminate table, smoke urethane edge. Forum lounge and worktables by Harter: gala clementine Knoll Textiles fabric, brushed frame. Smile chairs by Fixtures Furniture: orange juice poly, satin silver frame.

Be inviting. When spaces are both functional and cool, people are more likely to gather and interact.

Dewey: smokey white laminate, platinum urethane edge, satin silver paint. Smile chairs by Fixtures Furniture: kiwi light thermo, platinum frame.

Don't forget the details

Dewey by Fixtures Furniture is a complete collection, including a variety of available features for optimal flexibility and user adaptation.

The Helpdesk offers easy access to technology and power connections.

The Buddy works seamlessly with the Helpdesk and tables to provide an extra mobile surface.

The power/data trough provides simple, quick technology and power access. Powered tables can be connected together.

Dewey
Design driven, enhanced by technology, Dewey is all about supporting learning.

Design
Joey Ruiters

Environmental
Dewey features over 20% recycled content. Designed for minimal impact on indoor air quality, it has powder coat finishing and PVC-free components. No welded parts ease product breakdown for reuse.

Technology Support

Power/data system. Modular, non-sequential one- and two-circuit plug and play.

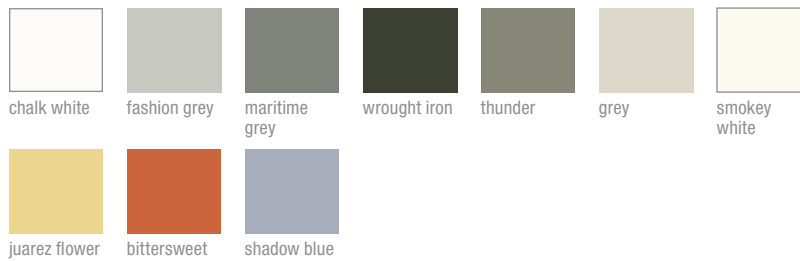

iPod/iPhone dock. Share data stored on iPhone/iPod by docking on Helpdesk.
